PROJECTS

Careeristo (Career Recommendation System)

A career recommendation system is an AI-driven tool that suggests personalized career paths based on an individual's skills, interests, and background. It analyzes data to match users with suitable job roles, helping them make informed decisions about their professional future.

CTGEEK (Coding Contest Website)

A coding contest website hosts programming challenges that allow users to solve problems, compete against others, and enhance their coding skills. Participants can join timed contests, climb leaderboards, and engage with a global community of developers.
